

DRYMEISTER™

Introducing DryMeister

DryMeister is a patented drying tool that quickly and effectively dries the inside of containers and areas that are hard to reach. Finally, there's a simple solution for your everyday drying dilemmas.

The specially designed drying heads attach to a long handle making it easy to reach, and dry, water droplets left behind after washing. The heads are made of an absorbent material that wicks the water and locks it in.

Now you can actually dry your items and put them away. Unless you like waiting hours for water to evaporate. Or you like cluttered countertops. Or scuzzy glass. If so, this product's not for you. Otherwise, from baby bottles to wine carafes and everything in between, DryMeister is the solution for Drying Made Easier.

- Reusable flexible handle
- Disposable drying heads
- Reuse of drying heads is at the user's discretion
- Designed for use in containers 1" wide or greater
- Keeps containers free of scum
- Leaves a dry, streak-free finish
- Helps reduce the risk of bacteria exposure from using dirty dish towels for drying
- Individually wrapped drying heads stay clean and dry until ready to use
- Refills available in 2 sizes and sold separately
